NB: The formulary listed above was reviewed October 2024. The ICB in Leeds may periodically review this formulary so it is therefore recommended that reference be made to the CPWY website, www.cpwpy.org, where the most up-to-date formulary will be hosted.

Pharmacists can supply any brand of product as long as the active ingredients are the same and pack size is at least the size specified above (i.e. larger packs can be supplied).

Products supplied must **not** be POM packs and each product must be supplied with a corresponding Patient Information Leaflet.

It is preferable that sugar free products are supplied. However, where these are not available, or the patient specifically requires sugar-based medicines these can be supplied. If pharmacies cannot get a specific medicine at stated reimbursement price, please email info@cpwy.org
