

Respiratory Domain Data collection form – PQS 2023/24

Collate the answers using a 5-bar gate approach and then add these up to give you the totals for each question. The totals will need to be added to the Manage Your Service (MYS) application when contractors make a declaration for a PQS payment.

Information required for the PQS declaration	Number of patients	Total
5.1 Inhaler technique checks		
The total number of patients identified as having been prescribed a new inhaler device who were offered an NMS.		
The total number of patients who were subsequently provided with a face-to-face NMS, including an inhaler technique check.		
The total number of patients who were subsequently provided with a remote NMS, including an inhaler technique check.		
The total number of patients who were referred to their prescriber due to issues identified during the NMS.		
5.2 Inhaler waste management		
The total number of conversations had with patients and/or their carer or representatives on the safe and environmentally friendly disposal of their inhalers		
5.3 Use of a spacer in patients aged 5 to 15 years		
The total number of children aged 5 to 15 (inclusive) referred to a prescriber for a spacer device where appropriate		
5.4 Personalised asthma action plan (PAAP)		
The total number of patients aged five years and above with asthma referred for a PAAP		
5.5 Referrals for patients using 3 or more bronchodilators in 6 months		
The total number of patients with asthma, for whom three or more short-acting bronchodilator inhalers were dispensed without any corticosteroid inhaler within a six-month period and who were referred to an appropriate healthcare professional for an asthma review
