

## Collating Pharmacy First Data from PharmOutcomes for the GP Referral Feedback Form

You can create a Pharmacy First consultation outcomes report on PharmOutcomes that will provide the data you need to complete the Pharmacy First Referral Feedback form.

There are 2 types of report:

1. A basic report
2. A CSV report

A basic report can be created by selecting the condition from the dropdown list. Select the time period you wish to look at, and then click on 'Examine Audit'

The screenshot shows the 'PharmOutcomes Reports' page. The 'Reports' tab is selected in the top navigation bar. On the left, there are sections for 'Your Reports' (stating no reports are stored) and 'Evidence and Outcomes'. The main content area is titled 'Provider Individual Performance and Audit Reports'. It features a 'Filter reports:' input field and a 'Select Report' dropdown menu. The dropdown menu is open, displaying a list of reports under the heading 'Specialist Service Reports'. The report 'Pharmacy First - Consultation Outcomes for: Pharmacy First - Patient' is highlighted in blue. Below the dropdown is a 'Reporting Period' dropdown menu set to 'Full Duration of Service'. A note at the bottom states: 'Note: Not all local reports have time periods'.

The basic report will provide you with a summary of the number of referrals sent and the outcomes of these referrals, but you won't be able to filter the data. It also won't tell you the reasons that the patient was escalated back to the surgery.

-		Advice given only ...	ADVICE_ONLY	

To get more detailed data you will need to run a CSV report. After selecting the Pharmacy First consultation outcomes report, and the time period, scroll further down the page and tick the 'Download as CSV file' box. Then 'Examine Audit'.

The screenshot shows a web interface for generating a CSV report. At the top, there are two checked checkboxes: 'Include audit' and 'Download as CSV file'. A red arrow points to the 'Download as CSV file' checkbox. Below this are two sections: 'Extended Audit' with checkboxes for 'CCG', 'Ward', and 'Local Authority'; and 'Patient Profiling' with checkboxes for 'IMD', 'IMD-Domains' (with a sub-note: 'Including: Income, Employment, EducationSandT, HealthDandD, BarriersHandS, CrimeAndDisorder, LivingEnvironment'), 'IMD-SubDomains' (with a sub-note: 'Including: IndoorsSD, OutdoorsSD, GeoBarriersSD, WiderBarriersSD, ChildYoungPeopleSD, SkillsSD'), 'IDACI', and 'IDAOPi'. At the bottom, there is a 'Ranking Divisions' dropdown set to 'None' and a blue 'Examine Audit' button. A small note at the bottom states: 'All indices of deprivation are derived from the published 2015 tables'.

The report will come through as a spreadsheet file\* which will allow you to filter for a specific surgery. You can also use the filters to isolate consultations where the patient was referred onward.

*\*Note: you will need suitable software, such as Excel, to view the spreadsheet.*
